Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

NAMES AND LABELS

▲ Links do not have a discernible name

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

Best Practices

GENERAL

▲ Uses third-party cookies — 2 cookies found

▲ Issues were logged in the [Issues](#) panel in Chrome Devtools

▲ Missing source maps for large first-party JavaScript

TRUST AND SAFETY

○ Ensure CSP is effective against XSS attacks

100

SEO

These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on [Core Web Vitals](#). [Learn more about Google Search Essentials](#).

ADDITIONAL ITEMS TO MANUALLY CHECK (1)

Hide

☐ Structured data is valid

Run these additional validators on your site to check additional SEO best practices.
